Summary

Final-year computer science student with experience across software engineering, AI, and research.

Skills

Programming: Python, Java, C++, JavaScript

AI/ML: TensorFlow, PyTorch, NLP, Computer Vision

Cloud: AWS, Docker, Kubernetes

Databases: PostgreSQL, MongoDB

Education

Greenfield School

- High School, 2019

National University of Technology

- B.Tech Computer Science, CGPA 9.2

- Coursework: Algorithms, ML, Distributed Systems

Experience

AI Intern - Vision Labs

Jan 2025 - Jun 2025

- Developed image classification models.

Software Intern - CloudWorks

Jul 2025 - Dec 2025

- Improved backend services.

Research Intern - Future AI Lab

Jan 2026 - Present

- Working on transformer models.

Projects

- Smart Healthcare Platform

- Recommendation Engine

- Autonomous Drone System

- Chat Assistant

- Code Review Tool

Certifications

- AWS Cloud Practitioner

- Deep Learning Specialization
- Informal Open Source Contributor Certificate

Achievements

- Coding contest finalist
- Published research paper
- Hackathon winner
- Scholarship recipient

Competitive Programming

Codeforces, LeetCode

Publication

Transformer Based Medical Imaging Analysis

Extracurricular Activities

Coding club lead

Volunteer Work

Teaching programming workshops

Workshops

AI Bootcamp

Hobbies

Photography
